IALTA
International Aviation Lease Training Association

Technical Lease Training Programme

The program covers the technical lease review including the airframe, structure, engine's, APU and landing gear right through to the typical lease costings; lease agreement terminology along with the checklists for each stage and an optimum timeline to follow ensuring on time delivery.

If you are currently in the aviation industry this program is the upskilling required to enter the lucrative aircraft and engine leasing market, if you are already in the leasing market this is a "must have" program to increase your asset knowledge and understanding of the technical requirements at end of lease.

All Programme and Courses come with Complimentary Toolkit to assist with the "How To"

Plans for the Records Process

Open Item List Spreadsheets

Review Checklists

These are downloadable attachments for the module for you to reference and use. They include a **Plan** for the Records Process, Open Item List **Spreadsheet** to record findings along with a **Checklist** to ensure that you complete all aspects that are required to review.

The demand for skilled and highly trained Technical Lease Transition personnel is growing and the IALTA program and courses along with its guidelines, checklists and tools will enhance your industry knowledge and advance your career path.

The aim of these courses is to ensure an understanding of the sector by increasing your appraisal of a lease transition or an asset transition by encouraging you to see the transition or asset from different perspectives.
